DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on February 22, 2006 has been entered. Claim 1 has been amended. No claim has been cancelled, or added. Claims 1-5 are still pending in this application, with claims 1, 4 and 5 being independent.

Allowable Subject Matter

2. Claims 1-5 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Applicant teaches an anti-dazzle louver assembly having a plurality of generally rigid sidepieces made of a metallic material, and a plurality of transverse partitions extending between the sidepieces. The partitions are grouped into modular units, such units including a selected number of partitions connected to one another by a plurality of relatively parallel connecting bars. The partitions are injection molded from polymeric material. In addition, the bars project beyond the partition ends a distance equal to about one half of the distance between two adjacent partitions.

Fishman (U.S. Pat. 6,402,345) and **Morgan** (U.S. Pat. 6,443,598) individually disclose a louver assembly including a plurality of generally rigid side and transverse pieces made either of generally rigid metallic or polymeric material. In addition, Morgan discloses the side pieces being made of an injection molded polymeric material combined with metallic transverse pieces for lowering manufacturing costs, while

providing high reflectance by using metallic (e.g. aluminum) transverse partitions.

However, the cited references failed to individually disclose, or suggest in combination, specifically the sidepieces being made of a metallic material, while the transverse pieces are made of injection molded polymeric material.

4. No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically an anti-dazzle louver assembly formed by a combination metallic side pieces and polymeric partitions, and bars projecting beyond the partition ends a distance equal to about one half of the distance between two adjacent partitions, in combination with the claimed anti-dazzle louver assembly.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
